

E6 Series

Commercial Emergency Lighting

Page 1 of 2

E611

Features

Illumination: Illumination is provided by two fully-adjustable polycarbonate lamp heads. Each lamp head utilizes a high-performance parabolic reflector in conjunction with a 6 VDC, 5.4 W T-5 wedge base tungsten lamp. High-impact acrylic refractors minimize glare and maximize optic control.

Housing: Constructed of impact resistant, UL 94 V-0, 5 VA thermoplastic, completely self-contained. White housing is standard, with an optional black housing available.

Operating Temperature

Range: Damp Location
68°F (20°C) to 104°F (40°C)

Diagnostic Electronics

(standard): 120/277 VAC dual voltage input with surge-protected, solid-state charging circuitry provides for a reliable charging system. Charging system is complete with low voltage disconnect, AC lockout, brownout protection, AC indicator lamp and test switch.

Self-Testing Diagnostics

(optional): Continuously monitors the critical functions of the equipment, including: battery disconnect, battery failure, charger failure, transformer failure and lamp failure. Self-Testing routine performs a one-minute test every 30 days, a 30-minute test on the 6th month and a 90-minute test annually.

Electrical Specifications:

0.045 A (120 VAC)
0.020 A (277 VAC)

Code Compliance

UL 924 and UL damp location listed. NFPA 101, NEC, BOCA, OSHA and IBC illumination standards.

Warranty

Three year full electronics warranty. One year full plus four year prorated battery warranty.
