Features

- Housing:** Die-formed steel, slotted for air return. Integral flanges at each end strengthen the housing and permit housings to be bolted together in continuous runs and facilitate suspension of fixture. Concealed openings for heat extraction and air return.
- Lamping:** Two T8 fluorescent lamps, as specified. Provided by others.
- Reflector:** Die-formed semi-specular aluminum.
- Louver:** Semi-specular anodized aluminum, 40° lengthwise by 30° minimum crosswise shielding. Supported along both edges by concealed frame of extruded aluminum. Bold baffle, prismatic lens, gold anodized louver, open or egg crate louver available, consult factory.
- Socket Channels:** Die-formed, pre-painted steel held by support brackets and allows for up to 6" (15.24cm) lamp overlap.
- Ceiling Trim:** Extruded aluminum with integral aligner splines.

Electrical

Specify 120 volt or 277 volt. 3 conductor, 18 gauge wire. Color-coded quick connectors allow ease of connection for joiner modules. For special circuiting, consult factory. Factory installed ballast disconnect allows the ballast to be disconnected from and reconnected to incoming power under load without turning the entire circuit off.

Dimming: Advance Mark X, use Advance compatible two-wire control (no extra control lead required).

Mountings

Wall Adjustment Bracket - Allows for inconsistencies in wall straightness. Die-formed steel used to mount system to the wall.

Finish

Ceiling trim painted baked enamel semi-gloss white.

Options and Accessories

90° inside, 90° outside, 135° inside, and 135° outside corners available.

Labels

UL, cUL and I.B.E.W.

Quick Calculators

Ordering Instructions

Individual Fixtures:

- Order number of FIXTURES.
- Order one END PLATE SET per fixture.

Continuous Rows:

- Determine run length.
- Use chart above to find catalog numbers. Each run ends with a telescoping unit.
- Order END PLATE SET for each open run.

Square/Rectangle Patterns:

- Consult plans and mark locations for corners.
- Calculate net footage of each run.
- Deduct corner dimension from each corner.
- Determine catalog numbers the same way as a straight run.

NOTE: Add to end of catalog number for desired ballast.

E81 = T8 Electronic 120v

E82 = T8 Electronic 227v

M71 = T8 Electronic Dimming Ballast 120v

M72 = T8 Electronic Dimming Ballast 277v
