

VEGA® MULTI-GANG, HEATSINK SCREWLESS FACEPLATES

Project:

Location/Type:

Description

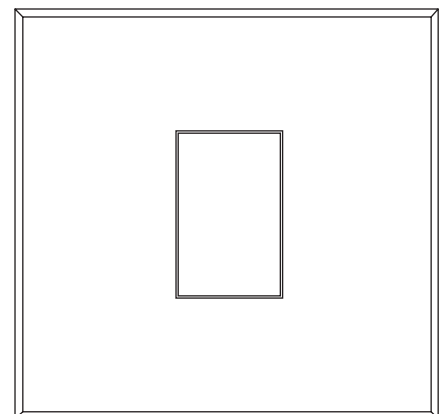

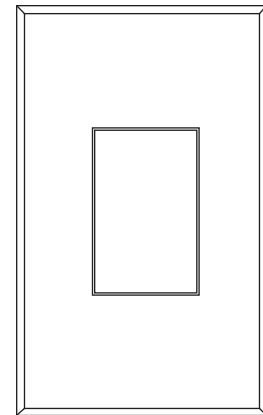

Vega® Multi-gang Heatsink faceplates are specifically designed to fit the unique shape of Vega devices. With sleek, beveled edges and screwless snap-on installation they lend an integrated look. The robust ABS plastic faceplate provides durability and one-piece design ensures proper alignment of all devices in a multi-gang installation. Vega Heatsink faceplates can accommodate one to six devices.

Two colors are available: White and Ivory.

Custom engraving on heatsink faceplates is also available.

Features

- Sleek beveled edges.
- Easy, snap-on application.
- Ensures proper alignment.
- Multi-Gang configurations available.
- Available in White or Ivory.
- Faceplates can be custom engraved.

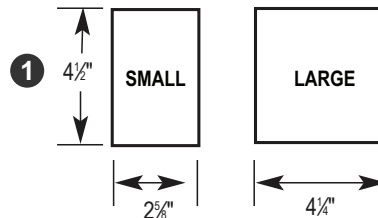

Ordering Guide

To order Vega® Multi-Gang Faceplates:

- 1 Determine the quantity and size (small or large) of all heatsink devices in the arrangement.
- 2 Arrange devices to suit faceplate configurations shown and note part numbers. NOTE: Small devices are always aligned to one side of the faceplate.
- 3 Add color suffix to each faceplate part number.
- 4 See "Ordering Guide" for required multi-gang wallbox size.

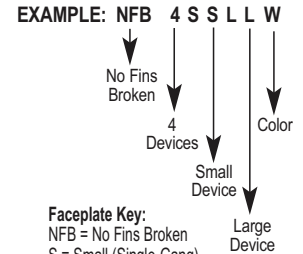

Note: Vega® faceplates are only available in No Fins Broken (NFB) configurations.
